PROTECTING AGAINST AD FRAUD, AMAZON SHOPPING

amazon

Amazon Shopping is the largest online retailer in the United States.

We have been working with Amazon Shopping in the USA since 2011.

Headquartered in Seattle, the retailer is the most popular online marketplace used by both individual as well as businesses

In 2021, Amazon surpassed Walmart as the world's largest retailer outside of China. Growth was driven in large part by its paid subscription plan, Amazon Prime, which has over 200 million subscribers globally.

CAMPAIGN APPROACH

amazon

THE OBJECTIVE:

Our goal was to generate a high volume of downloads through in-app display & decrease ad fraud levels.

THE CHALLENGE: FRAUDULENT INSTALLS

Working with ad networks allowed us to drive installs at a guaranteed CPI, however the lack of transparency within the buying model made Amazon highly susceptible to fraud. A different approach was required to prevent ad fraud from ad networks.

OUR APPROACH:

- We partnered with a 3rd party fraud monitoring solution to implement numerous new fraud prevention rules.
- Activity was optimized at the placement, source, and ad network level to reduce fraud rates and drive more high-quality installs.
- Fraud makegoods were implemented each month, saving Amazon millions in ad budget.

IDENTIFYING AND PREVENTING AD FRAUD

HOW WE IDENTIFIED AND REDUCED FRAUD

amazon

We analysed trusted display channels to determine normal traffic trends and how much variation is to be expected.

Results that were significantly outside the norm (ie x2 standard variations) were marked as fraud and deducted from billing.

Ad networks received fraud reports daily to track pacing and make optimizations.

Sources that showed high fraud rates were blacklisted on a weekly cadence, with clean sources scaling up with additional budget.

Ad Networks that had high fraud overall (>30%) were removed from media plans for the subsequent month.
