# CREATIVE TESTING, & THE IMPACT ON PROGRAMMATIC

amazon

Amazon Shopping is the largest online retailer in the United States.

We have been working with Amazon Shopping in the USA since 2011.

Headquartered in Seattle, the retailer is the most popular online marketplace used by both individual as well as businesses

In 2021, Amazon surpassed Walmart as the world's largest retailer outside of China. Growth was driven in large part by its paid subscription plan, Amazon Prime, which has over 200 million subscribers globally.

In this campaign we were tasked with increasing app-install conversion rates through creative A/B testing.

# CAMPAIGN APPROACH

amazon

## THE OBJECTIVE:

Our task was to increase conversion rates across programmatic display to drive more app downloads & to make creative work harder for media spend to drive better results.

## THE CHALLENGE:

After extensive testing, and many media insights optimized, Amazon needed to optimize creative in order to hit their Cost per Install goals.

## OUR APPROACH:

- ✓ Increase app-install conversion rates through A/B testing creative
- ✓ Test creative messaging & themes to see what drove the highest engagement
- ✓ Apply learnings to wider campaigns for greater impact overall

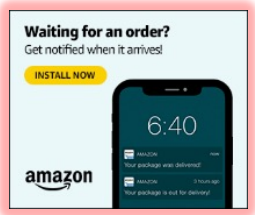
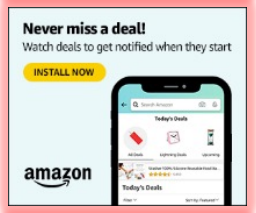
# HOW WE CONDUCED A/B CREATIVE TESTS

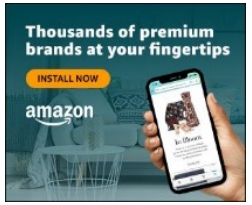
amazon

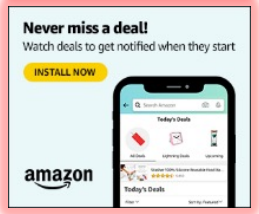
Users were shown a display ad with 1 of 3 Calls-to-Action (CTA's):

Download Now, Install Now, or Get the App.









All 3 versions ran at an even rotation across programmatic partners.

After enough results were generated (3-4 weeks), the CTA with the highest click-through rate & conversion rate was carried on into the next phase of the test.

This process was repeated with different creative themes:

- App features
- Contactless Delivery
- Premium Brands
- Tech Products

Finally, the top creative version stayed live for the remainder of the quarter.
