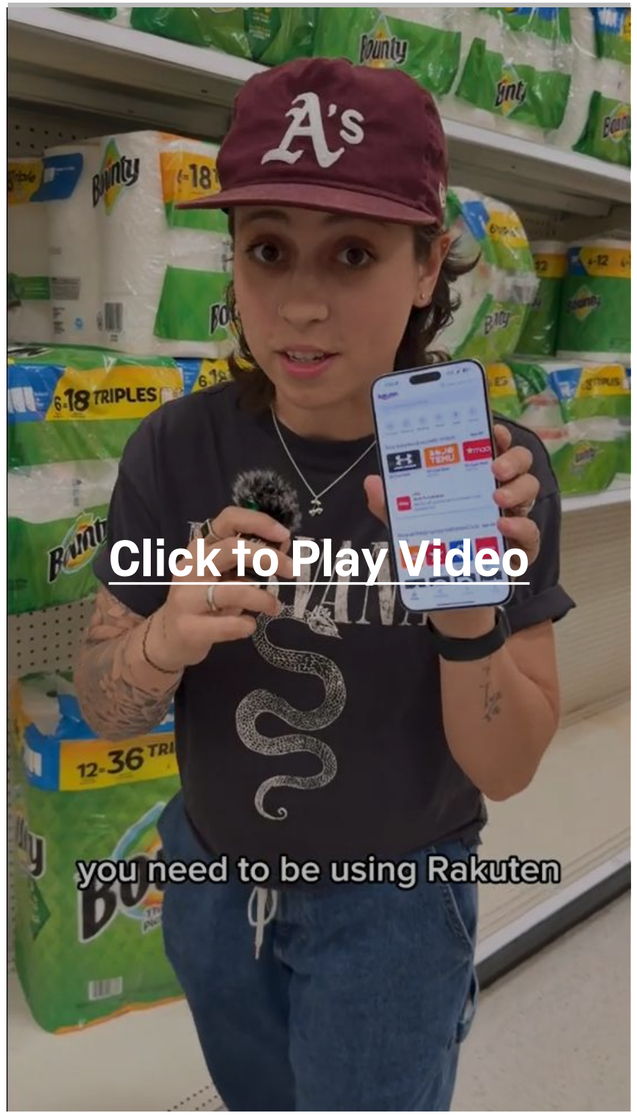
Case Study

Boosting Creative Efficiency on TikTok One for Rakuten

M+C SAATCHI PERFORMANCE | Rakuten



About Rakuten

Increase memberships to their Loyalty Program

Rakuten is a leading shopping and rewards platform that offers Cash Back from over 3,500 partner stores across categories such as fashion, beauty, and more.

On TikTok, Rakuten's campaign strategy centers exclusively on influencer-style videos to drive awareness and acquisition. Historically, sustaining a robust creative testing cycle was a challenge due to long production timelines and inconsistent quality from third-party partners.

Objective

Scaling Winning Creatives

Rakuten aimed to maintain a continuous pipeline of high-performing influencer-style videos that could fuel ongoing creative testing on TikTok. The goal was not only to keep content fresh and aligned with platform trends but also to improve cost-efficiency by quickly identifying and scaling winning creatives.

Challenge

Creative Production Misalignment

The primary challenge was misalignment between video production (3–4 weeks) and TikTok's fast-paced testing cycle (2 weeks). Additionally, creative output from previous partners often lacked quality and relevance, slowing momentum and affecting campaign performance.

Our Approach

Creative Strategy

To overcome production challenges and maintain quality control, Rakuten partnered with TikTok One to handpick creators whose style and tone aligned with the brand. This ensured every video launched was both on-brand and performance-oriented.

By streamlining creator selection and overseeing the process closely, Rakuten was able to produce a steady flow of engaging, trend-relevant content.

Recognizing the broader economic climate and consumer sensitivity around spending, Rakuten also experimented with new creative angles that resonated more deeply with its audience. For example, we launched and tested a campaign around “Essentials”, highlighting how Rakuten helps shoppers save on everyday necessities.

This approach tapped into consumer sentiment and reinforced the brand’s value proposition in a relatable, timely way.

Our Approach

Media Strategy

On the media front, Rakuten focused exclusively on influencer-style videos, leveraging them across business-as-usual (BAU) campaigns on TikTok.

Each creative was given a 2–3 week window in-market to gather performance data before decisions were made on scaling or pausing.

Creatives that failed to deliver results close to cost-per-install (CPI) and cost-per-sign-up (CPSU) benchmarks were retired, while top performers were scaled.

This agile, test-and-learn framework enabled Rakuten to continuously refresh its creative mix, optimize spend, and maximize efficiency on the platform.

The Result

By streamlining the creative process and leveraging TikTok One, Rakuten was able to reduce production bottlenecks and align video sourcing with TikTok's rapid testing cycles. The improved creative quality not only stabilized performance but also drove down acquisition costs across campaigns.

A standout example was the Essentials content launched in mid-February, within just one week, efficiency improved by nearly 50%, with cost-per-install averaging under $20 and cost-per-sign-up falling below $50.
