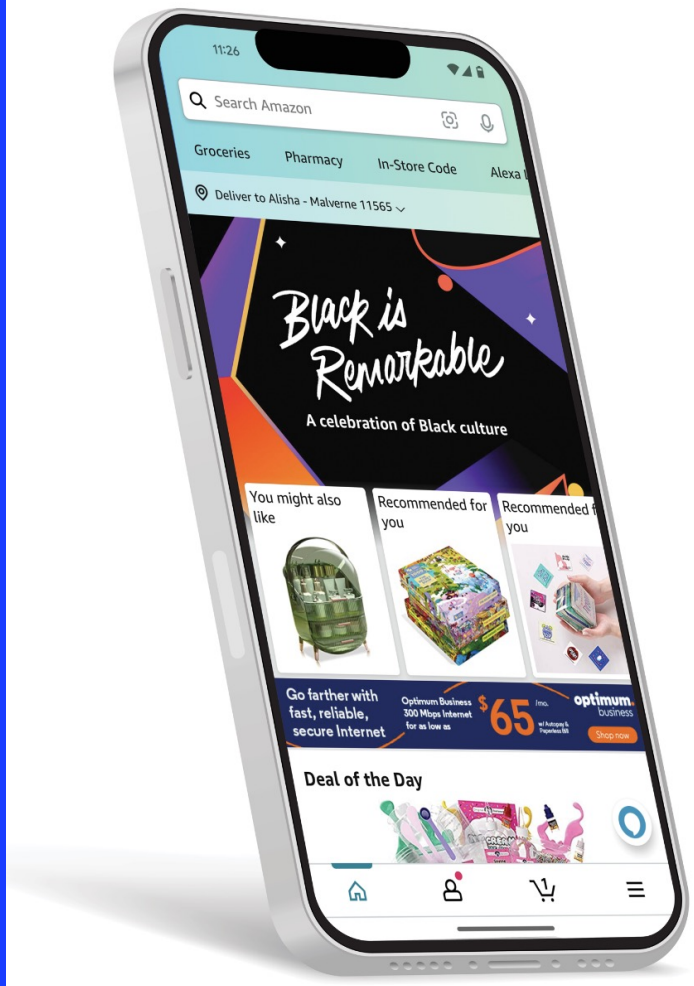
WE ARE M&C SAATCHI PERFORMANCE

WE CONNECT YOUR BRAND TO TODAY'S CONNECTED CONSUMERS

amazon



AMAZON SHOPPING
EXPANSION INTO BRAZIL & MEXICO

Amazon Shopping is the largest online retailer in the United States.

Headquartered in Seattle, the retailer is the most popular online marketplace used by both individuals and businesses.

In 2021, Amazon surpassed Walmart as the world's largest retailer outside of China.

We have been working with Amazon Shopping in the USA since 2011, managing standard digital media campaigns with a focus on driving CPA efficiency. Our partners range from programmatic partners to ad networks.

In 2023 we won the business to expand Amazon shopping campaigns in Brazil and Mexico.

CAMPAIGN APPROACH

amazon

THE OBJECTIVE:

Our goal was to expand the reach of Amazon Shopping into and throughout both Mexican and Brazilian markets.

The goal was to drive post-install events at efficient scale, mirroring the strategy of previous activations in the US and Canada, with adjusted KPIs.

THE CHALLENGE:

Gaining attention of new customers in two new geos. Online shopping has not saturated customer behavior in these two countries but competition for customer attention is fierce.

In Brazil media partners are limited to those with offices located in Brazil, which required the team to closely work with the client to ensure partners were suitable and would deliver results.

OUR APPROACH:

Our approach was to set up campaigns with proven partners to deliver new users, while testing new media partners to determine their ability to scale in the future.

The first step was establishing a Cost Per Acquisition goal for each market. We worked with the client teams to establish what the goals should be based on market and customer insights.

A test and learn approach was built to understand efficiencies, so we started with a limited number of media partners initially to enable learnings and build the ability to scale.

CREATIVE EXAMPLES

BRAZIL

MEXICO

Creatives for both Brazil and Mexico showcased key messages: For example, how easy the app is to use, benefits of shopping via the app, and deal-based messaging

A combination of evergreen creatives mixed with specific seasonal campaign creatives to support tentpole events like Prime Day were developed

M&C SAATCHI PERFORMANCE

CHOOSING THE RIGHT PARTNERS

amazon

Due to a focus on efficiency, the team chose to limit the limit the partner mix to trusted performers with a Cost Per Install/Cost Per Acquisition model to ensure any poor performance was mitigated.

BRAZIL:

- Liftoff (CPM), a proven performer in previous US/CA campaigns who showed a greater ability to scale up while maintaining efficiency as compared to other DSP partners.
- Shareit (CPA), another legacy partner with both a programmatic display offering as well as their proprietary peer-to-peer file sharing app.
- Avow (CPI), a local Brazilian partner recommended to us by our sister agency CSZ, whose inventory is drawn from an aggregation of four major OEM providers (Huawei, Xiaomi, Vivo and Oppo).
- AppNext (CPI), another partner with the ability to tap into OEM providers, powered by Affle.

MEXICO:

- Mexico, which launched after BR, included Liftoff, Shareit and Avow at launch based on their strong performance in Brazil. AppNext, still ramping up at the time of MX launch was held off the plan until performance was determined. New test partners include Creative Clicks and Ventes, both priced on a CPA, two of our highest scaling partners in Canada.
