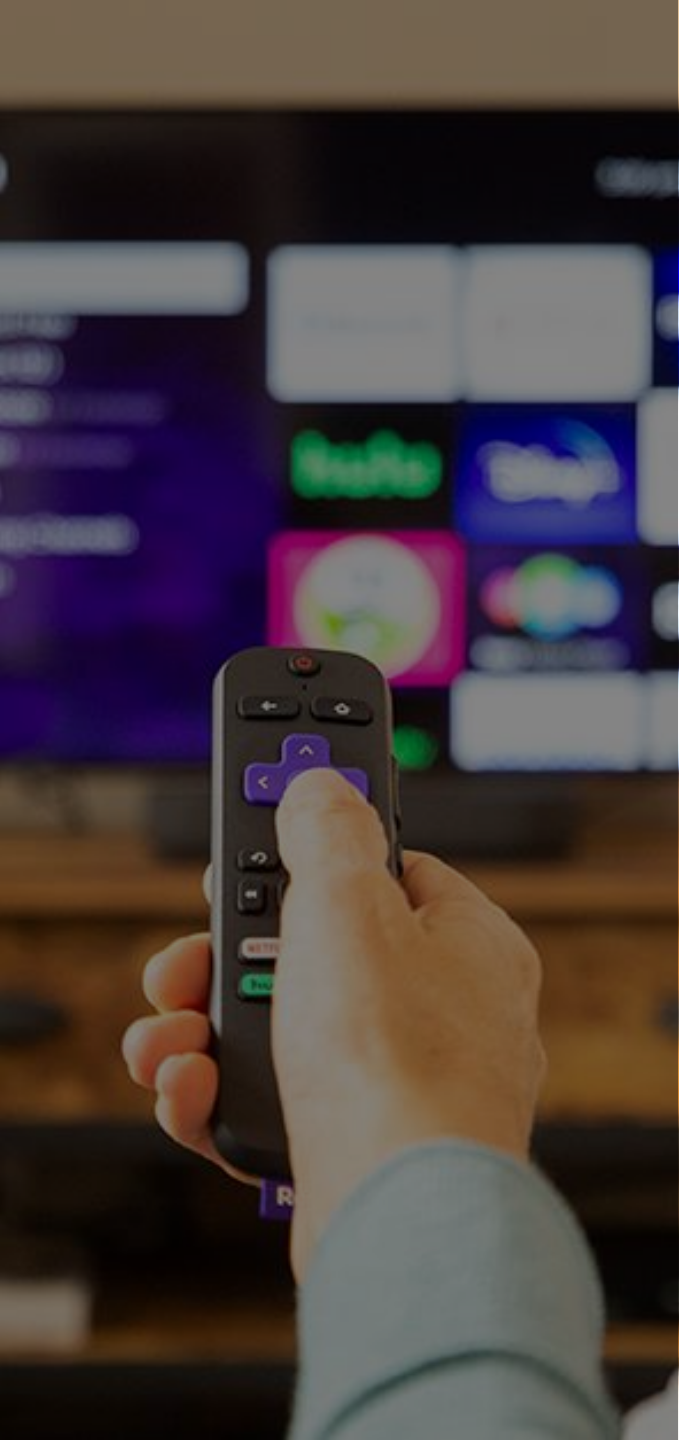
# CASE STUDY

## DRIVING INSTALLS & IMPROVING EFFICIENCY ON CTV FOR LOCAL NOW



FYND

# BACKGROUND: POPULAR FREE STREAMING APP

Local Now is a free streaming app that provides access to local news, weather updates, thousands of free movies and TV shows.

# OBJECTIVE: DRIVE INSTALLS & IMPROVE EFFICIENCY

Local Now wanted to encourage new users to install their app through a CTV campaign. They wanted to drive a competitive Cost Per Install while achieving a strong Video Completion Rate and low Cost Per Mille.

# OUR APPROACH:

We leveraged on two DSPs with CTV inventory: The Trade Desk and Roku OneView.

We used a combination of custom audiences and private deals across various suppliers to reach new customers by showcasing Local Now's TV offering and encouraging them to download the Local Now app.

The creative formats we used were 30 seconds long videos, non-skippable.

# RESULTS:

**Apr to Aug 2022*

**0.11%**
INCREASE IN VCR

**50%**
DECREASE IN CPI

**17%**
DECREASE IN CPM

**9,900**
APP INSTALLS DRIVEN
