CASE STUDY

INCREASING ROAS FOR MOBILE PREMIER LEAGUE

M&C SAATCHI PERFORMANCE

BACKGROUND: POPULAR MOBILE GAMING PLATFORM

Mobile Premier League (MPL) is a leading mobile platform where users can compete in multiple skill based mobile gaming tournaments in return for cash prizes. Since 2021, MPL is also active in the US.

OBJECTIVE: INCREASE ROAS BY GROWING GMV/USER

MPL's primary objective was to increase ROAS% by enhancing user journey to the app.

CHALLENGE: COMPETITIVE INDUSTRY

Acquiring users and keeping them engaged and retained in a highly competitive real money gaming industry requires constant innovation in features, events, and promotions to prevent user churn.

APPROACH:

- Guided by insights from MPL team, we delved into user behavior across all MPL games,, considering factors such as engagement, time spent, retention, and GMV (Gross Merchandise Value).
- Based on our research, we saw higher gross merchandise value from card games like Ginrummy, Spades, and 3cardflush which is why we shifted our media focus on promoting card games.
- For an enhanced user journey in the card category, we focused on 3 main pillars:
    - **Creatives**: Influencer and testimonial content, coupled with gameplay, played a crucial role in user acquisition.
    - **CPP (Custom Product Page):** Provided users with a comprehensive view of card games to enhance their understanding.
    - **First-Game Experience**: Ensured users experienced the same card game as their first, optimizing initial interactions

M&C SAATCHI PERFORMANCE

THE EXECUTION

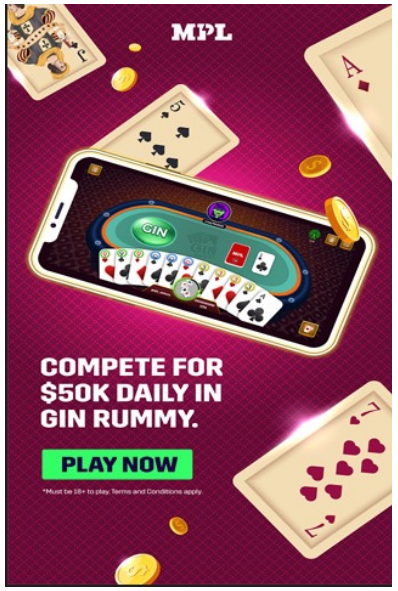
To enrich user journey within the card category, we implemented three main strategies:

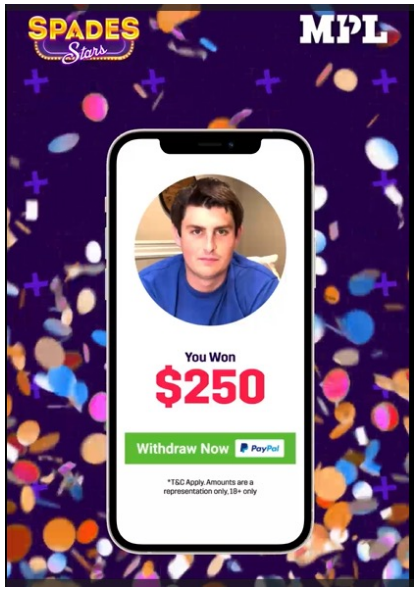
1. Enhancing creatives by showcasing influencers, gameplay and testimonials.

2. Developing custom product pages offering comprehensive information on card games.

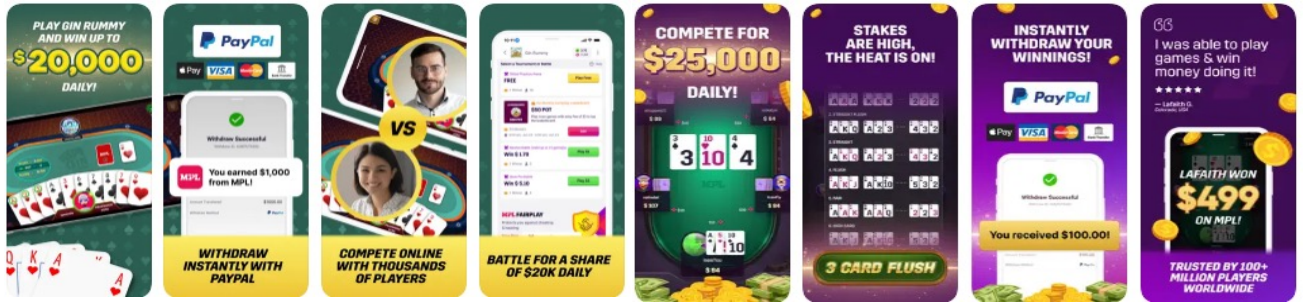
3. Optimizing first-game experience ensuring the first interaction with the app is with a card game

CREATIVES





CUSTOM PRODUCT PAGE



M&C SAATCHI PERFORMANCE

THE EXECUTION

In Week 44, we made strategic changes across major platforms like Video Gaming and Programmatic, shifting focus to highlight card games, specifically Ginrummy, 3CF and Spades.

These games were chosen due to their high revenue generation potential. By altering creatives, Custom Product Pages (CPP), and the first-game experience to emphasize these card games, we saw a significant improvement in performance: the GMV/user doubled, while (ROAS) increased by 40%.
