Case Study

Boosting Organic Conversions with Custom Store Listings for Headspace

M+C SAATCHI PERFORMANCE

headspace

Background

Digital Health App

Headspace is a leading digital health company specializing in everyday mental health support. Their app provides a platform for guided meditation, sleep support, stress management, and mindfulness exercises.

Objective

Boost Organic Conversions

To align with Sleep Week, Headspace aimed to boost organic conversions by spotlighting its sleep content.

Challenge

Competitive Category

Despite the app's broad awareness, competition in the sleep and wellness category was intensifying. App stores were saturated with niche apps focusing exclusively on sleep sounds, sleep tracking, or meditation for sleep.

M+C SAATCHI PERFORMANCE

Our Approach

By **leveraging Custom Store Listings (CSL) with sleep-related keywords** and combining it with strategic visual optimization, the campaign sought to:

Increase visibility for high-intent searches
Boost acquisition among users specifically seeking sleep solutions
Maximize conversion through relevant, engaging store experiences

To achieve this, we:

Identified and prioritized high-performing sleep-related keywords via developer console
Applied these keywords to CSLs for targeted reach
Designed a suite of new sleep-themed visuals (app icon, feature graphics, and screenshots)
Optimized title and short description for clarity
Rewrote long description to spotlight sleep as a core value proposition

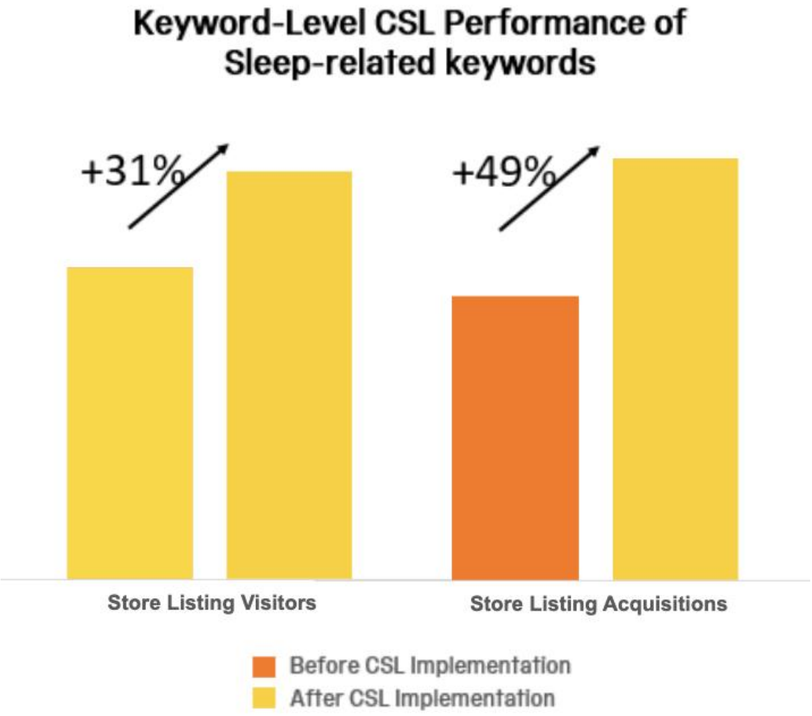
M+C SAATCHI PERFORMANCE

The Result

After 7 weeks, the Sleep CSL by keywords achieved:



31%
Increase in Sleep related store listing visitors

49%
Increase in Sleep related store listing acquisitions

26%
Improvement in store listing conversion rate
