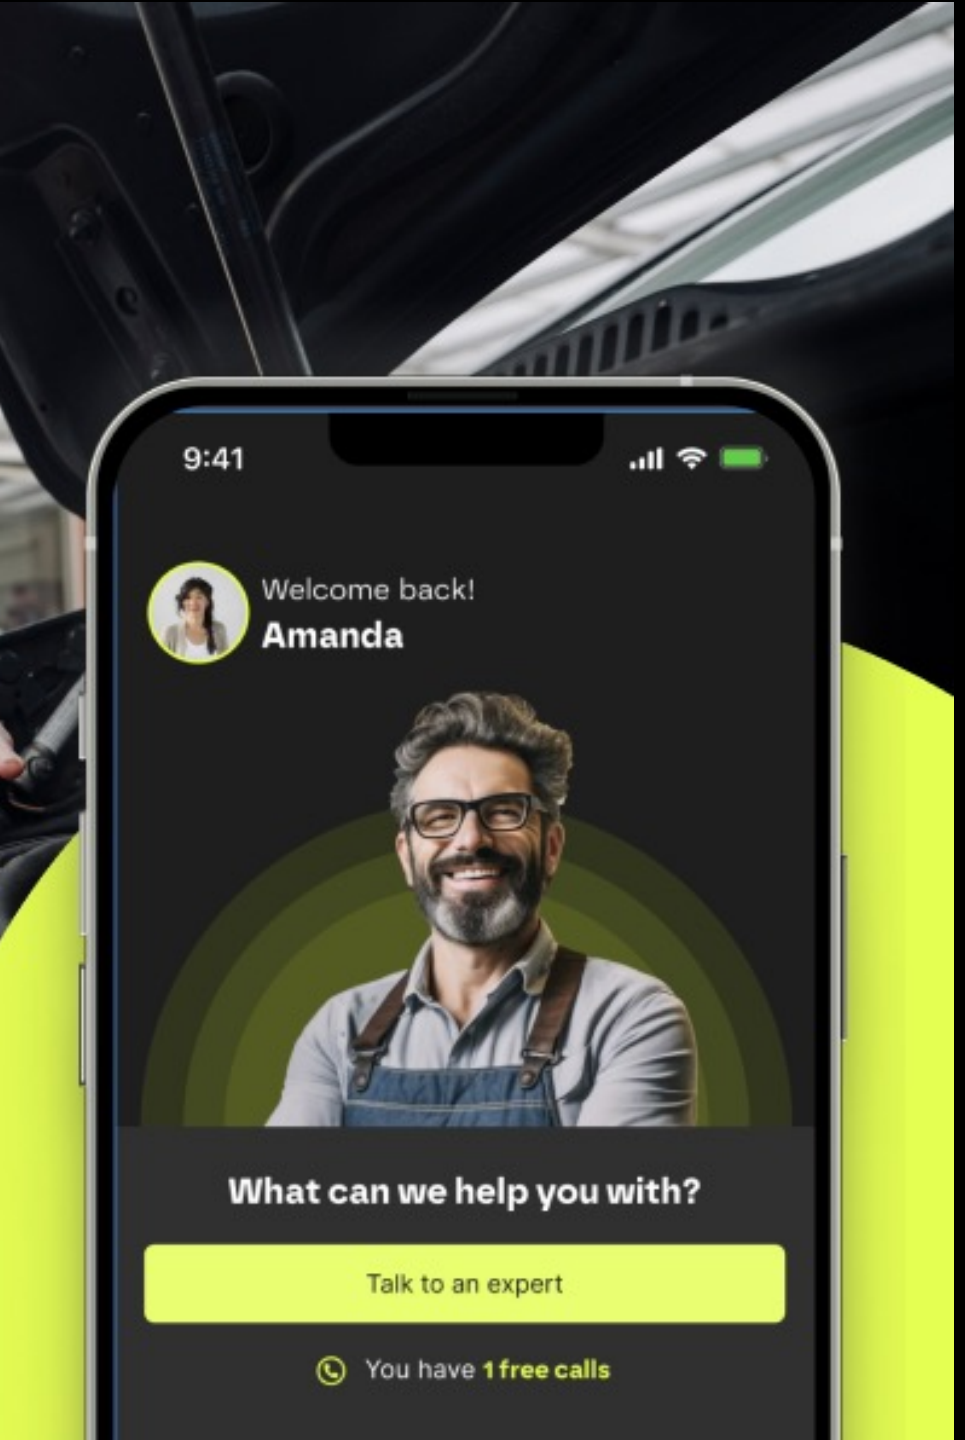
Case Study

Growing Tinker DIY Registrations and Awareness Across New Channels

M+C SAATCHI PERFORMANCE | tinker



Background

Platform & Community for DYI Projects

Tinker DIY is a creative platform and community dedicated to hands-on learning and innovation through do-it-yourself (DIY) projects. Designed for makers of all ages, it provides tools, kits, tutorials, and inspiration for everything from simple crafts to advanced electronics.

Objective

User Growth and Revenue

The campaign focused on driving user growth and revenue by generating at least 160K in-app registrations and 10K purchases of one-on-one expert calls, while expanding Tinker DIY's reach among new audiences such as small business auto shops and female DIYers.

Challenge

Low Brand Awareness

The brand faced low awareness outside its usual performance channels and needed stronger top-of-funnel investment.

M+C SAATCHI PERFORMANCE

Creative Approach

The creative approach was designed to resonate with users throughout every stage of the funnel, blending value-based storytelling, testimonial-backed trust and high-performing User-Generated Content (UGC).

- Developed vertical-specific creative to support new initiatives including Independent Auto Repair Shops with custom landing pages, CPPs (Custom Product Pages) and product-tailored messaging.
- Leveraged TikTok Creative Exchange (TTCX) and Spark ads to source authentic influencers within the automotive vertical and provide diverse perspectives for various audiences including new DIYers, females and car-savvy audiences.
- Tapped into Tinker DIY's own creator network to source trusted automotive industry individuals
- Activated value-based storytelling by spotlighting women DIYers in automotive for International Women's Month.

The creatives helped to address core user pain points including:

- Peace of mind through expert guidance available at your fingertips.
- Cost savings compared to traditional auto mechanic services.
- Building confidence in performing auto repairs or diagnostics, even when users had limited experiences.

These executions helped to establish Tinker DIY as a trusted alternative to traditional auto repair services, driving strong Registration CPA performance across channels like Meta and TikTok and a notable lift in unaided brand recall (+21% based on an internal Brand Lift Study).

Our Media Approach on Core Channels

We executed a layered full-funnel media strategy, combining proven performance channels with expanded awareness and engagement formats.

Core Channel Mix (Oct 2024 – Mar 2025)

- GOOGLE SEARCH & UAC: Capture high-intent installs, registrations, and core keyword coverage.
- APPLE SEARCH ADS: Boost high-quality installs and app discoverability.
- META & TIKTOK ADS: Drive audience testing and distribute engaging UGC-styled content.

Our Media Approach on New Channels

New Channel Expansion (March 2025)

- CONNECTED TV: Reach new audiences at scale across platforms like Roku and Hulu.
- PROGRAMMATIC AUDIO: Reinforce brand voice across Spotify, iHeartRadio, and Apple Podcasts.
- PROGRAMMATIC DISPLAY: Maintain visibility with targeted and retargeting placements across the web.
- PROGRAMMATIC DOOH: Build local awareness in strategic urban areas, including auto shops and transit environments.
- REDDIT: Engage auto DIYers and niche communities authentically.
- GOOGLE PERFORMANCE MAX & YOUTUBE SHORTS: Capture discovery-focused engagement with short-form video.

A Few Words From Our Team

"The team drove installs by helping Tinker DYI to craft stories that built trust, empowered auto DIYers, and made Tinker DIY stand out among competitors. From sparking real community engagement throughout Women's History Month to scaling efficiently across new channel activations like Connected TV and Programmatic Audio, the results prove that an intentional, audience-first strategy drives impact."
