CASE STUDY:

DRIVING AUDIENCE GROWTH THROUGH PROGRAMMATIC

M&C SAATCHI PERFORMANCE

Progressive Leasing™

ABOUT PROGRESSIVE LEASING

Progressive Leasing is a lease-to-own company servicing the United States.

Customers can use Progressive Leasing for big ticket purchases, for example furniture, electronics, jewellery, fitness equipment, and more.

Progressive Leasing customers can apply for a lease in person at participating stores, or via progleasing.com.

M&C Saatchi Performance began working with the client in July 2023. Our brief is purely to manage a programmatic campaign in select Designated Market Areas (DMA) across the US.

Progressive Leasing™

CAMPAIGN APPROACH

theTradeDesk

THE OBJECTIVE:

Progressive Leasing's business challenge is to increasing the U.S. customer base and drive lease approvals nationwide.

The primary KPI is to hit a specific Cost per Approved Lease target at scale with secondary goals to achieve incrementality.

THE CHALLENGE:

The lease-to-own market is highly competitive and Progressive Leasing needs to stand out amongst multiple competitors post pandemic.

OUR APPROACH:

The brief was specifically to run a programmatic display campaign in select DMAs across the U.S. The programmatic campaign runs across desktop and mobile web utilizing cost-efficient static display banners.

Incrementality was measured through an always-on Public Service Announcement (PSA) test. This relies on a control group being held out and shown PSA ads to establish an organic baseline. Results are then compared against the Test group to measure the incremental increase in approved leases driven by branded advertising.

To ensure KPIs are achieved we leverage the technology of one of the leading DSPs, The Trade Desk, chosen because of their extensive reach and advanced audience targeting and tracking capabilities.

To ensure efficiency the team makes consistent manual optimizations on factors such as frequency, creative rotation, inventory supply, and audience testing and refinement.
